The Mexican Revolution.

We have been much interested of late in read-

ing the papers, pronunciamentes, and various documents issued by the Mexicans who, under Alvarez, are making trouble for Santa Anna in the tottering republic upon our southern borders. The designs of the military despot who rules that unhappy country are apparent enough to all who have watched their development for the past two years, but it seem quite probable that a sufficient portion of the element of true democracy has been infused into the minds of the better class of Mexcans to thwart the President in his plaus of Empire. We doubt not that in Mexico is to be found a host of true patriota who will resist the further progress of Santa Anna towards the destruction of the republican form of government, and they will have the best wishes of the people of this country. The people of Mexico, however, are generally so ignorant that they are scarcely to be depended upon by either patriots or despots, the latter having altogether the best hope of con-

trolling them. The following declaration of principles, which has lately been issued by Alvarez, is one which must commend his cause to the sympathy of the

THE BELOW JOURNAL. - This paper, established

by our friend J. R. Briggs, Jr. in 1848, we have always regarded as one of the model journals of our State. Fair in its opinions, courteous in argument, high-toned in principle, and always alive to the best interests of its town and State, the Beloit Journal has been a fit and creditable representative of the thrifty, moral and intelligent community in the midst of which it has been published, and an honor to the Wisconsin Press. It is with no little regret, therefore, that we notice in the last number the valedictory of Mr. Brisos, who has been compelled, by failing health, to dispose of his interest in the establishment to his junior partner, Mr. C. G. Fostza, and to resign his Editorial Chair to Mr. J. A. BREWSTER. We trust that a few months of repose will restore our friend Baroes to health, and we can offer no better wish to his successors than that they may be able to maintain the high character for ability, integrity, and independence, which, under the conduct of Mr. Baros, the Beloit Journal has always and deservedly enjoyed.

THE TELEGRAPH IMPOSITION. We notice that a great deal of indignation is poured out by the N. Y. Evening Post and some other papers upon the head of Mr. Chaig, of the N. Y. The English steamer Sampson, which had been surveying on the coast of Circassia, vehicle has been curveying on the coast of Circassia, returned to Constantinople on March 11, bringing tidings of a complete victory gained by the Circassians over the Russians. Early in March the Circassians, provided with arms and ammunition, attacked the Russians, and, after a severely contested but-tle, drove them into the castles on the coast.— These castles were surrounded and repeatedly attacked during four continuous days. Finally, the Russians, fearing to be cut to pieces, blew up their magazines, and sought shelter in their ships. The Sampson further reports that the Circassians fell on the gariscons who were retreating from two hill forts, and put them to the sword. The Circassian coast is, at pre-ent, free from the enemy. that harbor:

Since our last steatmer edition we have had quite a fleet of vessels of war in our harbor, and the exchanging of noisy salutes from the "adamantine lips" of the "dogs of war," with which these vessels of war are pleutifully furnished, here frequently stortled the nerves of our peacefulcitizers, and caused the "everlasting hills" which surround our beautiful bay to shudder in the reverberation of the "cannon's awful roar," Wo have had at one time, the flags of four of the greatest Powers in the world, flying on the peaks of four as fine looking, well-manued ships as it might gruttfy the anabition of any man to command. These four were—the British frigate President, of 50 guns; the United States frigate, St. Lawrence, of 50 guns; the Russian frigate Diana, that harbor: ident, of 50 guns; the United States frigate, St. Lawrence, of 50 guns; the Russian frigate Diana, 52 guns; and the French frigate Fotte, 60 guns. Besides these, which were all 15 ing within a good cable's length of each other, we had the usual store ships of the British, United States, and Chilian governments. During their stay, the various Commanders exchanged friendly visits, and numerous have been the salutes on these occasions. It is a gratifying sight to see these representatives of the oreatest nations in the world meeting in merous have been the salutes on these occasions. It is a gratifying sight to see these representatives of the greatest nations in the world meeting to gether in our pesceful harbor and associating on terms of mutual friendship and amity, and it is our earnest and sincere hope that notwithstand in githe present threatening aspect of affairs, consequent upon t a Oriental question, the day is far distant when these Powers and their representatives skall meet in any other attitude, or with other feelings towards each other. The President with I left for Arics and Callao on the 21st, and the Diana and Forte on the 23d—the former for Sand, wich I slauds and the latter for Callac. During the time the Russian frigate was in port, her officers are semarkably intelligent, well bred and good looking men, and have by their urbanity, affability and gentlemanly deportment, secured the extrem and good wishes of many persons here both native and foreign. When questioned as to the most fairtien, they were naturally reserved. But when asked in reference to the probability of a hostile encounter between the "Dinana" and "President," what were their opinions of the issue, the Russian Commander was only heard to say, "We shall never strike our flag." From the appearance and character of the officers and men, we can readily believe that they are capable of keeping their word, and rather sink with their ship than survive the disgrace of a defeat.

The British frigate "President," used to be the American frigate of that name. She was captured, it will be remembered, during the last war by a British fleet, and is one of the few marine rophies that John Bull can boast of having won trophics that John Bull can boast of baving won from Brother Jonathan. As the Russian frigate sailed for the Sandwich Islands, where there are usually some French or English vessels f war, it is quite likely that her Captain has had a chance ere this, to make good his words. In fact we should not at all wonder if the French and English vessels which met him as friends at Valparsias should accounter him as enemies at the Sandwich Islands. Mesting:

Washington Crty, D. C. April 26th, 1854.

GENTLEMEN. GENTLEMEN.

I have had the honor to receive your letter of the 14th instant, enclosing a copy of the complimentary resolutions, adopted "at a large and enthusiastic Public Meeting," of the citizens of Milwaukee. I am highly gratified to learn, that my opposition to the policy of "granting the Public Lards of the United States to private corporations." has severed the surveyed of an intelli-

Public Lar ds of the United States to private corporations," has secured the approval of so intelligent and respectable a portion of the citizens of one of our most ficurishing Western States.

I have never entertained a doubt, that reflection and experience, would sconer or later satisfy the people of the New States, that grants of lands to private corporations, for Rail Road purposes, were wrong, both in principle and in policy. The object of the new States is speedy settlement; but corporations are interested in holding up their lands for the highest prices, that can be exterted from those (who must purchase them. Oitizens desire to promote the public interests of the State; but corporations have no other object in viewthan the promotion of their own private and sellish purposes. Oitizens are interested in the rethan the promotion of their own private and sel-fiel purposes. Oltizens are interested in the re-duction of the price of the lands to the lowest possible sum; but corporations are interested in forcing the lands up to the highest price they will bring in the market. Oltizens are interested in the induction of freights on rail road lines to the lowest amount; but the interest of your people is to build up your own cities and towns, by increasing their population and promoting their mechanical, commercial and general business prosperity; but with corporations all such great objects are merely secondary, and must give way to the privace interests of those who control the corporation. corporation.
It is a trite but nevertheless a true saying, that

It is a trite but nevertheless a true saying, that "corporations have no souls." The history of the Rock River Valley Union Rail Roed Company in your State, furnishes an admirable illustration of its truth. If this corporation had "a soul to be sared," or "a body to be hanged," would it have made such representations, as it did make, to the "money changers" of Europe? Would it have made such representations as it did make to the politicians at Washington, when it was struggling to seeme a liberal slice of the public lands? What interest, what sympathy, what community of faeling, has this corporation from this corporation embarked in the enterprize, because it promised a rich pecuniary harvest—immense wealth to those directly interested?

This grant, if made, would have done little or This grant, it made, would have done little or nothing towards the development of the resources of your State, or towards the promotion of the presperity of your people. It could have had no other effect, than the distruction of Milwaukee and your other Lake shore cities and towns, and of these will not in comparate, which have been of those rail road improvements, which have been projected, fostered and sustained by the private enterprize, and the pecuniary means of your citi-

zers.

In conclusion, you will present to those whom you have the honor to represent, my best wishes for the prosperity of the City of Milwaukee and your interesting and thriving State, and my thanks for the flattering estimate which they have placed upon my efforts to defeat the selfish purpose of a "soulless corporation." For the politic manner in which you have communicated their wishes, accept assurances of my most distinguished consideration.

RRITISH CORN TRADE.

The British Corn Trads.—With the exception of aimower on the morning of the 13th instant no rain has fallen, and we begin to hear of complaints from different parts of the country of the wast of moisture. The late sows Barley has not come up so evenly as could be desired, and the Whast plant in many localities is thin on the ground. The reports from the agricultural districts are, however on the whole, of a favorable character, and a few warm showers would suffice to remedy any slight milenier which may have been caused by the long continued draught and prevalence of east winds.

There has not been much solivity in the grain trade since our last, still a flir consumptive business has been done, and the tendency of pieces has been rather to advance than otherwise. The deliveries from the growers have been on the same scanty scale as for some time past and the crivitalism out-oad have been moderate. Not the slightest inclination has been shown to enter into specula tive invariants, and the milers and dealers, having still some portion of what they bought two or three weeks ago on hand, have acted cautiously. The belief that they will before long, be obliged again to visit the ports at which the bulk of the stock of Foreign corn is held, has rendered importers firm, more especially as the pressure for monery, which ind so unfavorable as nifect on the trade some weeks ago, has lessened mistorially. D. G. POVER. Perfectly Disappointed. WE had until of late considered the days for selling and course for buring Patent Medicines past, and that the now ern in Medicine touck greet the world's fetered in-babilants. But we give it up, Dr. A. L. Adams' Liver Balsam is taiked of more, used more and creating greater tensation than any other Compound before the public, and should not this be the case? It is positively producing more cures than any other Medicine non-extent. It is an catenable fact that this Medicine is as good for what it laims as a Warrant, e -and we are jet to learn of the first faiture in what it claims to do. We pleage our selves that there is no humbug about it. See (he testimonials in this

Williams, dated Mel-ford, March 1, 1812.—"To Professor Holloway.-Bir,-Feeling grateful for the benefit my wife has derived by the ase of your Pills, I consider it my duty to inform you of t. Soon after the bieth of her last child, her feet and aneles began to swell, and afterwards her whole body, strong-ly indicating dropsy, this occurred at the turn of lite. I obtained the best medical advice but her health continued

to decline. I then tried your Pills, which I am happy to say have restored her to sound and perfect health? J. The best evidence that can be adduced in favor of The left contacts of Hoofand's German Bitters, prepared T Dr. C. M. Jackton is the unprecedented demand for tem from all parts of the Union; and akhough there may be many compounds prepared and represented as being worthy of a liberal patronage, yet we feel constrained to remark that the rast number of testimonials with which he worthy doctor has been honored, by persons of the biguest character and respectability, who found it necessary to have course to his preparation, is testimony sufficiently conclusive, that a more effectual remedy for the alanst immediate relief of those [afflicted with that direful malady, dyspepsia, has never been discovered.

A Wordnessur Discovery has recently been made by Dr Curtle, of this city, in the treatment of Consumption, Asth me and all diseases of the lungs. We refer to "Dr. Cur-tifs' Hygeans, or Inhaling Hygean Vapor and Cherry Syr-up." With this new method Dr. C. has restored many afcted ones to perfect health; as an evidence of which, he has incumerable certificates. Speaking of the treatment, a physician remarks:—1t is erident that inhaling—constantly breathing an agrocable, healing vapor, the medicinal properties must come in direct contact with the whole of the actial cavity of the lungs, and thus escape the many and varied changes produced upon them when introduce into the stomach, and subjected to the process of digestion The Hygochals for sale at all the dynggists' throughout the country—New York Dutchman, Jan 14th.

THE ABOVE NAMED PREPARATION has become textensively anown throughout the length and broadd or the United states and is universally admitted to be the most delightful, healthful, healthful, deliners, and have preparation of the junifer betry, that schene and a long ratotice in the distinction and preparation of pure liquors have ever anceceded in producing.

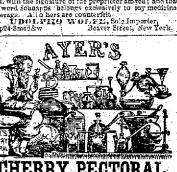

A long-established manufactures and importer of liquors of every description, the undersigned devoted United I to the production of an article of pure gin, which should prove a valuable agent in the cure of the manufact distinction of the intended distinction of the between the control of the between the state of the pure gin, which should gin has been prescribed by the medical faculty. Its years, attength his efforts were crowned with success, at his extensive dist liery in Schindam, Holland, from which page the purest gin has long been imported, and he was enabled to give to the world his Schinappe, which, for purity and entire freadom from the territious fasted oil and all other noxious ingredients, and delightful aromatic flavor, has never been equified, and cannot be excelled.

In order for protect himself from penum say, less at the lands of others, importors, find bitates, with would un questionably alternate to paim off a vite and spurious article upon the unsuspecting, community, and, like the world in sheep's cholining, prey upon floid rever yields, he resorted to the expeditation of tropo ting and selling his Schnappe only in put and quart bottles.

In the second state of the contraction of the colors with houses, where pure wines and liquose critice had readily, and for a more train, they are treely used by all classes, and drunkenness is hardly known—that vice to might the couplet of the immortal poet on suply applies:
